

Fire

I could use a little help now
I been waiting for quite some time
All the rumors that cross my mind
My doubts don't wait line

I could use some words now
Everything will turn out fine
I'm trapped in a ball of twine
Please tell me i'm all right

Friday evenings i spent reading
About life that i'm not living
And I feel like i am losing time
Adrenaline is kicking
When i'm thinking what's been missing
The next magic moment could be mine

I could use some fire
To finally be louder
To get out of the corner
The wind is picking up

I could need some fire
I'm bursting with excitement
So sick of being silent
Come let this be the start

I could use a little dance now
I been learning tango
I'm alone in my living room
I'd only need a partner

I been singing love songs
But i've never been in love before
I'm too good at closing doors
You and i both know

Friday evenings i spent reading
About life that i'm not living
And I feel like i am losing time

I could use some fire
To finally be louder
To get out of the corner
The wind is picking up

I could need some fire
I'm bursting with excitement
So sick of being silent
Come let this be the start

Go and kiss a stranger
Quit your job - become a painter
That's what you've been dreaming of for so long

I could use some fire
To finally be louder
To get out of the corner
The wind is picking up

I could need some fire
I'm bursting with excitement
So sick of being silent
Come let this be the start
